

CAN AI JUDGES BE A VIABLE ALTERNATIVE TO HUMAN JUDGES BY MITIGATING THEIR INHERENT LIMITATION?

GEON JEE, G01605988

RESEARCH MOTIVATION

- Recently, academic interest about AI judges has increased for resolving human judge's problem.
- But, previous research about AI judge tend to focus on only technical issues.
- So, my research purpose is to evaluate whether AI judges can be a viable alternative to human judges based on representative theories about the essence of law

PROJECT 2 KEY POINT

Morality ≠
Law

Legal Positivism

Objectivity

Clarity

Sharper foundation for moral criticism

Predictability

vs

Natural law theory

Subjectivity

Intellectual Confusion -> Anarchy, Quietism

Natural
law exists

Morality >
Law

This is more appropriate through
the essence of law than natural law theory

PROJECT 2 KEY POINT

Human judge's problem

01

Applying
legal theories
far with essence of
law

02

Misusing
legal theories
(ex: originalism)

03

Unconscious
Bias

PROJECT 2 KEY POINT

AI judges → Have a Potential for resolving recent problem

Algorithmic Mechanics , Consistency, Designable in alignment with the nature of law

if

social

academic

technical

fulfilled

PROJECT 2 KEY POINT FINAL

Legal positivism vs
Natural law theory

Human judge's
problem

Evaluation of
AI judges

First, I researched the essence of law based on legal theory.

Evaluate AI judges based on researching whether AI is appropriate for essence of law And AI can resolve human judge's problem.

OVERVIEW

Can AI judges can be a viable alternative to human judges by mitigating their inherent limitation?

Academic field is so important for making discussion about AI judges

AUDIENCE ANALYSIS

I selected law school students as target audience.

Law school students

vs

Legal professionals

Hard to make change

Discussion ->
Academic Field->
Social field

Future legal professionals, more flexible
about AI (their generation & current statue)

Current legal professionals, conservative

GENRE ANALYSIS

Instagram Post

Visualization, familiar to gen Z

Booklet

Professional, professional details

GENRE ANALYSIS

But, considering my topic

Key point -> Sending message to target audience, opportunity for discussion

If they want professional message -> thesis

I selected Instagram Post
As project genre.

RESEARCH ANALYSIS

Research sources -> popular source vs scholarly source

Considering target audience, and genre -> **Popular source**

1. Legal theory part -> I will not add source link.

2. Human judge's problem part -> Add two popular sources as link.

3. AI judge part -> Add one scholarly source

**** Although it is scholarly, I will use this source as it uses interest simulation research way with visual results.**

PROTOTYPE KEY CONCEPTS

Design strategy

Background color is Instagram color (gradient with pink, purple, yellow, orange)

Use Instagram post design it is (Hashtag, UI, lettering etc.)

Visual Strategy

1 (TITLE) + 4 pages (1 page per each section) = 5 page,

BUT PPT page can be 9 to 10 considering text's volume.

Component

Key concept (image post, self-created) + description + reference link for law school students

Professional terms, Casual tones

CONCLUSION

This
project

Discussion
about this
topic by
law school
students

Academic
discussion

Social
discussion
